**of Marijuana.**

*MariTrust is dedicated to the medical well-being of patients who may benefit from medical marijuana.*

**MARI**Trust  
*It's in our name*

## Our Focus is on the **Medical Benefits of Marijuana**

MariTrust was founded by corporate executives with an extensive background in pharmaceutical development. Unlike most dispensary operators, MariTrust executives were not drawn to the medical marijuana business simply for the opportunity offered by evolving state laws. They recognized a need for a clinical pharmaceutical-style company that is dedicated to the medical well-being of patients who may benefit from medical marijuana.

You'll experience this clinical approach at every MariTrust facility and from every MariTrust Treatment Counselor. At your first treatment consultation, the proper grade of medication will be selected specifically for your health issue. You will be given a medication chart to record your treatments and the results. At your next consultation with

a MariTrust Treatment Counselor your chart will be reviewed and your suggested grade of medication may be altered to better meet your needs.

Medical marijuana is still a new form of medical treatment and much research needs to be done to improve patient outcomes. MariTrust is at the forefront of this research and our patients will enjoy the benefits of our growing knowledgebase.

Your medication chart will be anonymously added to our database and combined with anonymous patients with similar conditions to continuously fine-tune our recommended treatment for your specific condition.

- 
- A group of four diverse young adults (two men and two women) are smiling and posing together against a white background. They are arranged in a cluster, with some leaning on each other. The top of the page features a green abstract graphic with curved shapes.
- The same level of care you expect from all healthcare professionals.
  - Each grade of MariTrust medical marijuana has a recorded chemical fingerprint.

## Overcoming Your Initial Concerns

Many people with chronic conditions who could benefit most from medical marijuana have never even seen marijuana. They frequently associate it with the illegal under-culture and fear a trip to a dispensary will bring them in contact with that segment of society.

MariTrust Treatment Counselors treat every patient with the same understanding you expect from any healthcare professional. After selecting your grade of medication, your MariTrust Treatment Counselor will discuss various usage options and will help select the best administration regimen for you. Please express all questions and concerns that you may have. Your MariTrust Treatment Counselor wants you to be completely comfortable with your selections before you leave the MariTrust dispensary.

## Selecting the Right Grade of Medical Marijuana

MariTrust submits each grade of medical marijuana to an independent laboratory for testing. Each grade has a recorded chemical fingerprint that measures the levels of five compounds including CBD, CBD-A, CBN, THC, and THC-A. Your MariTrust Treatment Counselor will review the Botanical Test Results for your selected grade and its comparative benefits. If a dispensary cannot show you similar test results, they probably do not test their medications and you will never know if you are getting similar product throughout the year.

## Choosing Your Treatment Options

Contrary to what you may have heard, smoking marijuana is NOT the only way to use it therapeutically. MariTrust offers a wide range of treatment options including food products (also known as "edibles"), tinctures (cannabinoid-infused vegetable glycerin syrups), and even salsa!

Your MariTrust Treatment Councilor will review the many food based options with you and help to determine which form best meets your needs and taste preferences.

## **Talk to your physician**

You must speak with your physician before starting treatment with medical marijuana. Your physician will discuss lifestyle changes and traditional pharmaceuticals that may help your condition. If you both agree that medical marijuana is right for you, your physician will provide you with a recommendation. Following your first visit to MariTrust, we will submit your recommendation paperwork to the state for issuance of a license to possess medical marijuana (copies of your paperwork serve as a temporary license in the interim). When requesting your license, a MariTrust Treatment Counselor will be designated as your caregiver; this will allow MariTrust to provide your medicines.

**Your MariTrust Treatment Counselor will explain the licensing process in detail.**
